Pine Ridge Golf Club

Overview

Located in the beautiful undulating pine forest of Camberley, Surrey, Pine Ridge Golf Club's course is long but accessible for all abilities.

Complimenting it's 6,458 yard course is their 36-bay, floodlit driving range enabling you to practice your swing into the night.

Our challenge

Having revolutionised how golf is watched on the TV (at major events like The Open, Ryder Cup and USPGA Championship), Quadratek was asked to participate in the installation of TopTracer at Pine Ridge Golf Club's driving range. The system is designed to enhance the golfers' trajectory by tracking each ball and delivering graphics onto a screen for the golfer to analyse.

What we did

Quadratek installed Cat6A external grade cables between the cabinet and the 8 camera locations, in IP-rated enclosures. A further 4 Cat6A external grade cables were installed between the 8 high-level cameras.

34 Cat6 external grade cables were installed between the cabinet and each Bay Screen location.

The system was linked to the network by new OM4 Fibre Links.

Result

The TopTracer project was completed and opened to the public in December.

The system is designed to enhance the golfers' trajectory by tracking each ball.
